

Git report

first part was initializing the repository:

```
PS C:\Users\z4ch\Documents> cd .\tpgit\  
PS C:\Users\z4ch\Documents\tpgit> git init  
Initialized empty Git repository in C:/Users/z4ch/Documents/tpgit/.git/  
PS C:\Users\z4ch\Documents\tpgit> cd .git  
PS C:\Users\z4ch\Documents\tpgit\.git> ls
```

Directory: C:\Users\z4ch\Documents\tpgit\.git

a slight issue i remarked is that the student 2 part has not been pushed to github yet it was merged to master before being pushed to github so when i have done the git pull no branch has been pulled from my side. this forced me to recreate a merge conflict on my own since the problem can't be resolved.

i created the conflict and here it is

```

PS C:\Users\z4ch\Documents\tpgit> git merge sauces
warning: Cannot merge binary files: sauces.txt (HEAD vs. sauces)
Auto-merging sauces.txt
CONFLICT (content): Merge conflict in sauces.txt
Automatic merge failed; fix conflicts and then commit the result.

```

to fix it i changed the files manually adding the diff of both files.

```

PS C:\Users\z4ch\Documents\tpgit> git add sauces.txt
PS C:\Users\z4ch\Documents\tpgit> git commit -m "manually fixing the diff"
[master 3bdc40d] manually fixing the diff
